✉ ankit.scrps@gmail.com | +91-6232-729-560 | 3.6+ years exp.

Skills

Languages: Java, SQL

Frameworks / Libraries: Spring, Spring Boot, Microservices Architecture, REST API Development, Flowable BPMN, Groovy + Spock (Unit Testing)

Databases: MySQL, MariaDB, MongoDB

Messaging / Streaming: Kafka, RabbitMQ

DevOps & Tools: Docker, Git, Maven, Jira, Postman, Log4j, CI/CD, IntelliJ IDEA, VS Code, awareness about AWS, ELK Stack, Linux (Ubuntu)

Design & Architecture: Understanding of GOF Design pattern and Microservices Design Patterns.

Profile Overview

Software Developer, team player, and leader with versatile skillsets.

Java Backend Developer with 3.6+ years of experience building scalable, reliable, and maintainable microservices using Spring Boot, REST APIs, Kafka, and relational & NoSQL databases. Skilled in unit testing, workflow automation (Flowable), Docker-based deployments, and CI/CD pipelines. Actively applying GOF, JEE, and Microservices design patterns to design maintainable and high-performance backend systems.

Work Experience

MasterCom Technology Services, Chennai
Software Engineer

Aug 2024 – Present

- Developed and led a **network product** using **Flowable BPMN with Spring Boot integration**, enabling cross-functional teams to streamline workflows and complete tasks efficiently.
- Designed and implemented **B2B-focused features** supporting multiple objectives and business processes.
- Mentored team members and contributed to existing projects, improving code quality, maintainability, and delivery speed.
- Applied **microservices principles and design patterns** to build scalable, reliable, and low-maintenance backend modules.

Loyalty Methods, Hyderabad
Junior Associate Consultant

July 2022 - Feb 2024

- Rebuilt **proxy and digital services** with a new middleware codebase using **Java 17 and Spring Boot**, improving system performance and maintainability.
- Optimized **AWS resource usage**, reducing infrastructure costs significantly for the product.
- Developed a **client-specific service** to handle routing logic, integrate with **Kafka**, manage phases via **Spring Cloud Config**, and implement business rules dynamically.
- Monitored **buffer and buffer-replay systems** to ensure **zero downtime** while onboarding new clients; provided active product support during deployments and testing. Contributed to a **product-focused, client-centric startup environment**, delivering reliable features and fixes for ongoing production services.

Education

Sunrise University

Apr 2023 – Aug 2025

Master of Computer applications (MCA)

Mahatma Gandhi Chitrakoot University

July 2017 – Mar, 2021

Bachelor of Computer Science (BCS)

Full stack Java Training

- Focused on **Java, Spring Boot, Oracle SQL, and Microservices Architecture**.
- Gained hands-on experience in **real-time project development**, including backend services and database integration.

Certificates

- NASSCOM certified Java Backend developer**
